

## Boosting SOcial and Organic farming for inclUusive and sustainable gRowing eConomiEs

### OBJECTIVE

The main project objective is strengthening the **connection between social farming and organic farming** by supporting upskilling processes of farmers and aspirants to spread organic and social farming for sustainable and inclusive ecosystems.

The project will contribute to the improvement of the existing training practices and to **design a common VET syllabus** for the so-called “social organic farmer” by boosting green innovation and the transition to sustainable production and **inclusive societies** in the future.

### ACTIVITIES

The activities of the project foresee:

- a **collection of best practices** on social and organic farming at EU level and their analysis to create a knowledge baseline as common ground for future development;
- the **social-organic farmer profile** description and social-organic farmer vocational training syllabus to identify skills and competences;
- stakeholders engagement and **policy influencing** to co-create policy recommendation to boost social and organic farming.

### EXPECTED RESULTS

- A **digital glossary** focused on agrosocial practices
- A **Best Practices** document
- The social organic farmer **skills profile**
- A social organic farmer **VET syllabus**
- A **Policy Recommendations Paper** for stakeholders to support the diffusion of social organic farming through adequate educational policies

### THE CONSORTIUM

The project is promoted by European partners: **Italy**, **Hungary** and **Greece** who propose social organic farming as a sector for social sustainable and inclusive initiatives.
